Excellent global performance even on difficult-to-tag materials

Our Dogbone® inlays and tags are designed for global supply chain, industrial and RTI applications, offer excellent performance in demanding environments and on different materials.

Dogbone® inlays and tags have a good tolerance to the detuning effect of high dielectric materials, providing effective global performance even on difficult-to-tag materials. They are available with the NXP UCODE G2iL chip that offers 128 bits of EPC memory. The inlay is size-optimized for 100 mm / 4 inch wide converted labels, and is available in dry, wet and label / sticker delivery formats.

Our inlays and tags are compliant with ISO 9001:2015 Quality Management and ISO 14001:2015 Environmental Management, which ensure a reliable and state-of-the-art product that meets a variety of application needs, enhancing RFID usage for difficult-to-tag materials.
